

Introduction to Voidosophy by Joseph D. Smith

Joseph D. Smith is the founder of Voidosophy, the worship of black holes as divine regions in space, as a religious philosophy. Voidosophers find comfort, and peace through thinking about, and visualizing the amazing beauty and strength of the power of black holes! By imagining that they are in the presence of a black hole or even inside of one, is so exhilarating to the Voidosopher!

Thinking about black holes everyday and often, will lead you to be Liberated, Saved, Enlightened and however you else prefer to say it. Black hole energy is always there for use as an occult magic practice, for insight, for healing, and for other uses! The black holes can suck out your problems if you shall only reach out to ask for their help. They are the portals to manifest your every desire, so ask the black holes for anything, as they are an impersonal force that sustains the Universe!
